DHRUVIL PANCHAL

New York, NY | 9294454811 | dhrupanchal2005@gmail.com | LinkedIn | Portfolio

SUMMARY

Analytics Engineer / Data Analyst with 3+ years of experience building dbt models, designing analytics-ready data warehouses in Snowflake, and developing SQL and Python-based ETL/ELT pipelines. Designed and deployed 15+ dbt models that automated KPI calculations and improved pipeline efficiency by 40%, while establishing data quality checks and documentation for trustworthy reporting. Built executive Power BI dashboards that translated complex product metrics into actionable insights, cutting ad-hoc reporting turnaround by 60%, and partnered with cross-functional stakeholders to support analysis and decision-making.

CORE SKILLS

Data Modeling & Transformation: dbt (Core & Cloud), Snowflake, SQL, ETL/ELT, Star Schema & Slowly Changing Dimensions, Semantic Layer & Metric Definitions, Data Testing & Documentation, Dimensional Data Modeling, Data Pipeline Development
Reporting & Dashboards: Power BI, Tableau, Amazon QuickSight, executive & department-level dashboarding, self-serve reporting
Analysis & Insight: Python (pandas), R, A/B Testing, statistical analysis, anomaly detection, logistic regression, random forest
Data Quality & Governance: Data quality checks & alerting, data dictionaries, lineage documentation, CI/CD (GitHub Actions, Docker)
Cloud & Platforms: AWS, Redshift, S3, Azure, BigQuery, Databricks, Fivetran, PostgreSQL, REST APIs, Apache Kafka, Spark Structured Streaming
AI & Automation: Generative AI

WORK EXPERIENCE

ThirthaSoft, LLC | ***Data Analyst*** **Jul 2023 - May 2026**

- Designed and deployed 15+ dbt dimensional data models that transformed raw sources into clean, well-documented, analytics-ready tables, automated KPI calculations, and improved pipeline efficiency by 40%.
- Built and maintained executive Power BI dashboards that translated complex product metrics into clear insights for leadership, enabling self-serve reporting and cutting ad hoc reporting turnaround by 60%.
- Partnered with product and marketing stakeholders to run A/B tests and anomaly-detection analyses, surfacing hidden feature-impact signals and framing tradeoffs with data.
- Implemented CI/CD pipelines for Snowflake data models using GitHub Actions and Docker, improving deployment reliability and version-controlled release velocity.
- Established data quality checks and validation routines across data pipelines, ensuring trustworthy, documented, and on-time reporting for downstream stakeholders.
- Used Tableau and SQL to uncover customer behavior patterns from e-commerce datasets, delivering actionable market research insights to product and marketing teams.

ITHENA | ***IT Intern*** **Jun 2022 - Aug 2022**

- Supported data pipeline development and ETL processes, improved SQL query performance, and implemented automated data-cleaning routines for client-facing BI reports.
- Collaborated with senior BI analysts to validate data integrity and support exploratory data investigations for stakeholder reporting.

Save Ancient Studies Alliance | ***Technical Team Lead*** **Aug 2024 - Oct 2025**

- Directed API ingestion of 100K+ historical records and built Power BI dashboards for academic research stakeholders.

PROJECTS

AI-Augmented Finance Complaints Classifier

- Built Python and SQL ETL pipelines to process 10,000+ finance complaint records and trained classification models achieving 85%+ accuracy, identifying top complaint categories to inform customer service improvements.

Real-Time E-Commerce Clickstream Pipeline

- Architected a Kafka, Spark Structured Streaming, and AWS Redshift pipeline that processed 500K+ daily events, designing a data schema to support downstream churn prediction and recommendation models.

EDUCATION

M.S., Business Information Systems **Aug 2021 - May 2023**
Cleveland State University
- **Achievements:** Beta Gamma Sigma Honor Society

B.S., Computer Science **Aug 2017 - May 2021**
Gujarat Technological University

CERTIFICATIONS

- dbt Fundamentals: dbt Labs, 2025 **2025**
- Hands-On Essentials: Data Warehousing & Collaboration: Snowflake **2024**
